User Journey Map

⚡ USAGE

⚡ FIRST EXPERIENCE

The user opens the app for the first time and has to create an account. For the registration process, the user has to put in its email address, name, and password to get into their account.

The user doesn't necessarily want to create an account to check the app out, but decides to do it anyway to get the lay of the land.

⚡ Adding new quests

User begins to add new quests to be completed.

Let's see what we have here!

serenity

Now I have to do these quests.

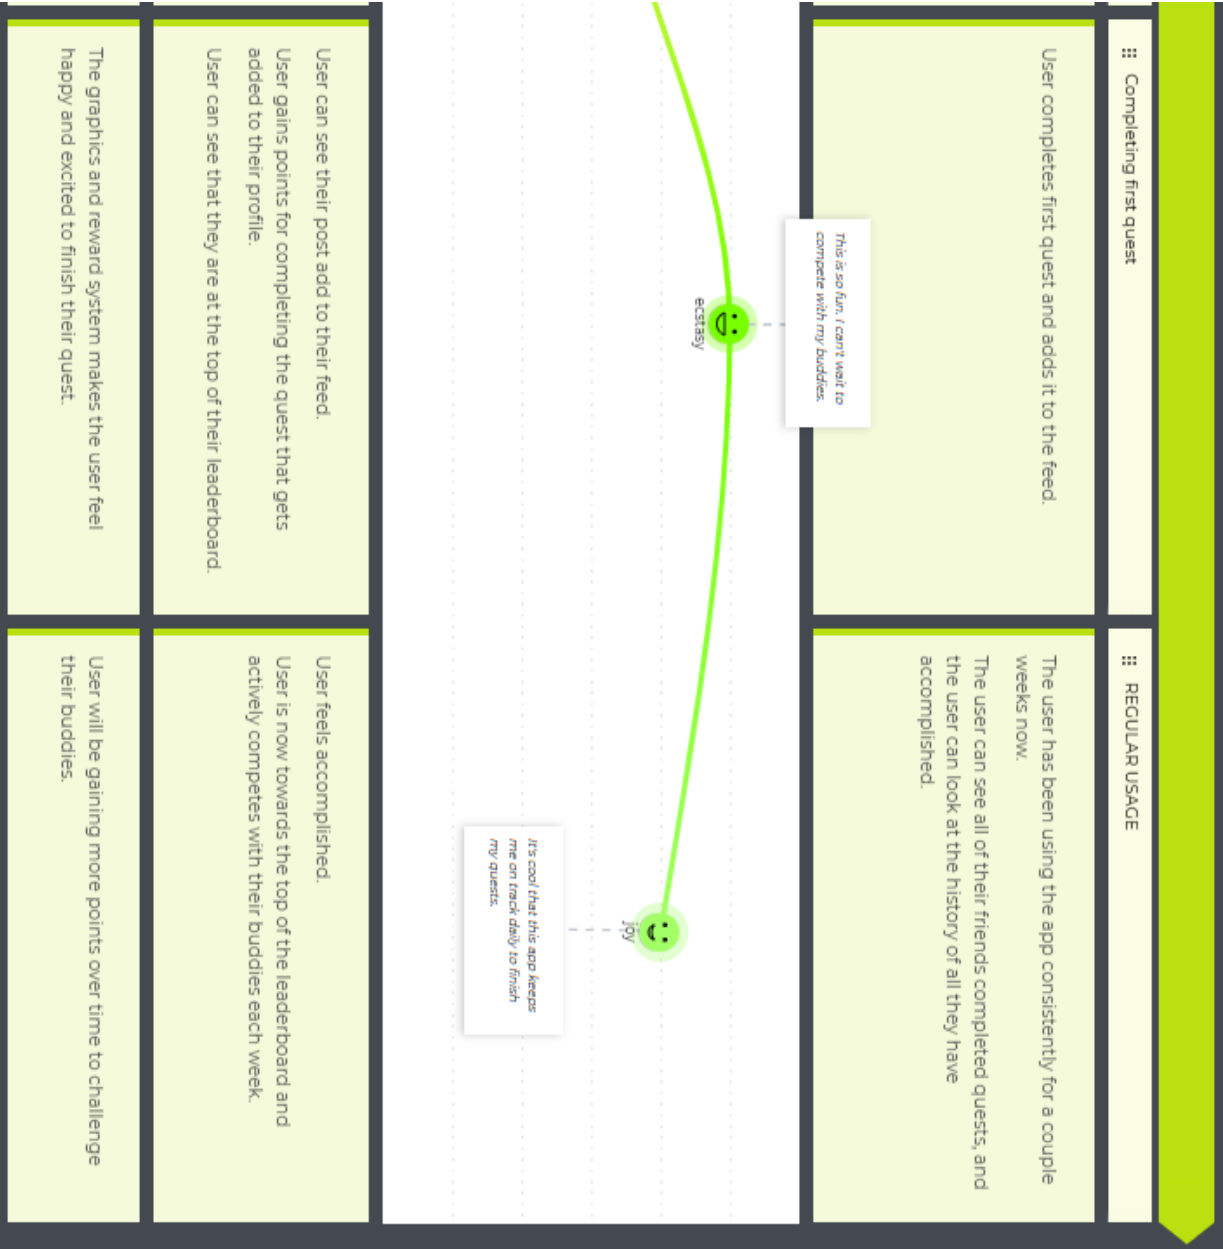

apprehension

User can see their profile and begin to add their friends to grow their buddy list.

User feels overwhelmed and realizes they have a lot of things to do.

Wants to skip registration process.

Clear and understandable UI allows them to create new quest.

Contributions

IBM Meeting: Abby, Tyler, Arushi, Micah.

- Abby: Participated in the IBM Meeting, designed the logo and onboarding pages, assisted in hi-fi production (color palette, navigation).
- Tyler: Participated in the IBM Meeting, assisted in logo redesign, assisted with Hi-Fi mostly with routing and interactions in Figma.
- Arushi: Participated in the IBM Meeting, Assisted in designing profile pages of Hi-Fi, and some other key components used in Hi-Fi,
- Micah: Participated in the IBM Meeting, worked on the User Journey Map, dealt a lot with the prototyping and routing of pages of the hi-fi, and did the lo-fi for the app.
- Reinhard: Assisted in lo-fi production. Assisted in Hi-Fi production.
